

1 Amendments to the Claims:

2 1. (currently amended) A method of providing electronic lottery games over a wireless
3 network from a electronic betting service to a wireless game terminal having a
4 display and button array, comprising the steps of:
5 transmitting a game identification number over said wireless network
6 to said wireless game terminal;
7 transmitting a plurality of game parameters associated with said game
8 identification number over said wireless network to said wireless
9 game terminal, wherein the game parameters comprising button
10 array configuration and a game display layout for said display;
11 receiving data related to selections on said wireless game terminal
12 associated with said game identification number;
13 calculating a win/loss value at said electronic betting service; and
14 transmitting said win/loss value to said wireless game terminal.

1 2. (currently amended) The method of Claim 1, further comprising the step of transmitting a
2 selection of possible games wherein said game identification number and
3 said plurality of game parameters are associated with a game selected from
4 said possible games.

1 3. (currently amended) The method of Claim 1, further comprising the step of crediting an
2 account when said win/loss value is a positive value.

1 4. (original) The method of Claim 1, wherein said calculating step occurs after said
2 receiving step.

1 5. (original) The method of Claim 1, wherein said calculating step is performed for each
2 possible selection associated with said game identification number.

1 6. (cancelled).

1 7. (cancelled).

1 8. (original) The method of Claim 1, further comprising the step of storing information
2 associated with said game identification number on a database.

c3, 23-30

1 9. (cancelled).

1 10. (currently amended) A method of playing electronic lottery games over a wireless
2 network on a wireless game terminal having a display and button array,
3 comprising the steps of:
4 accepting a lottery game selection from said wireless network;
5 receiving a game identification number and a plurality of game
6 parameters associated with said game identification number from
7 said wireless network, wherein said plurality of game parameters
8 comprising button array configuration and a game display layout for
9 said display;
10 accepting at least one gaming selection from said wireless network
11 according to the rules of said selected lottery game; and
12 receiving win/loss value information from said wireless network based
13 on said at least one gaming selection.

1 11. (Currently amended) The method of Claim 10, further comprising the step of logging
2 in on to said wireless network to receive a selection of lottery games.

1 12. (currently amended) The method of Claim 10, further comprising the step of crediting an
2 account when said win/loss value is a positive value.

1 13. (original) The method of Claim 10, further comprising the step of storing information
2 about said at least one gaming selectiongame on a database.

1 14. (original) The method of Claim 10, further comprising the step of calculating a win/loss
2 value for said selected game.

1 15. (cancelled)

18. (currently amended) An interactive services display and response system for providing games over a wireless network, comprising:

- a betting service provider on said wireless network; and
- a wireless game terminal connected to said wireless network to communicate with said betting service provider over said wireless network;

wherein said betting service provider is configured to transmit a game identification number over said wireless network to said wireless game terminal, transmit a plurality of game parameters associated with said game identification number to said wireless game terminal, to receive data related to selections on said wireless game terminal associated with said game identification number, calculate a win/loss value, and transmit said win/loss value to said wireless game terminal; and

wherein said wireless game terminal is configured to accept a lottery game selection, receive said game identification number and said plurality of game parameters associated with said number, accept at least one gaming selection according to the rules of said selected lottery game, and receive said win/loss value information based on said at least one gaming selection.
